DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Evidence that claims 1-9 fail to correspond in scope with that which applicant(s) regard as the invention can be found in the specification. In the specification, applicant has stated (Specification, page 8, lines 16-20) that the process is characterized in that crude 2,6-naphthalene dicarboxylic acid in the form of an amine salt is refined by recrystallizing it from a mixed solvent including an acetate, and this statement indicates that the invention is different from what is defined in the claims because claim 1 and its dependents claim a process comprising crystallizing the free carboxylic acid itself from a mixed solvent including an acetate.

Claim Objections

3. Claims 7-9 are objected to because of the following informalities: Claims 7-9 recite in multiple locations the unit label "C". Applicants should amend each instance to the correct label "°C". Appropriate correction is required.
4. Claims 7-9 are objected to because of the following informalities: Claims 7-9 recite in each the phrases "of25" and "of-10" in lines and 4, respectively. Applicants should amend each instance to introduce a space and remove the hyphen, respectively. Appropriate correction is required.

Conclusion

5. Claims 1-9 are pending. Claims 1-9 are rejected.
